W. L. WILLIAMS

TABLE OF CONTENTS, VOLUME XIV.

EDITORIAL.

APRIL.—One Year Older.—Our past work—the Review is the veterinary organ of the country—our efforts to make it what it is—the progress made by the profession imposes upon us duties that must be fulfilled—our increased size in the future.—Veterinary Schools Commencements—The publication of their *comptes rendus* is a duty to the graduates—special events only deserve special notice—the last exercises of the American Veterinary College—the communication from the French government—the text of the dispatch and its meaning—American veterinary profession recognized in Europe. Army Veterinary Legislation.—the bill before Congress—our hopes of its passing—slow recognition in Europe—the success of the bill is a great step for the advancement of veterinary science in America. More Room For Quacks in the State of New York—A new law before the Legislature—the law of 1886 almost annulled by it—or at least its good effects destroyed—how long will this last—who will look after the execution of the law. Actinomycosis—The subject before the State Board of Live Stock Commissioners in Illinois—veterinary opinions on its contagiousness. Notice—To our subscribers.

MAY.—Docking Horses' Tails.—Merely a freak of fashion—philanthropy and humanity opposed to it—their objection—another reason against it—empirical and unscientific mode of performing it—its justification when performed *secundum artem*—Massachusetts Society for the Prevention of Cruelty to Animals—New York City Courts—no regular graduate will perform it—Dr. Paul Paquin and Dr. Paul Gibier.—One establishes the first laboratory for veterinary vacine matter—the other establishes the first institute for the treatment of prophylaxy of rabies—the advantages that these institutions offer—the first bulletin from the Pasteur Institute of New York.

JUNE.—"Be Gentlemen."—National peculiarities in closing curriculums of medical and veterinary schools—Commencement exercises—their preparations—students take the burden of them—college officers reserve but one part—selection of the *orator*—this is the hardest of all—our opportunities to hear many of them—now a treat, often a disappointment—Prof. McEachran's of Montreal Veterinary College—its superiority and proper application—full of wisdom and very *apropos*—an excellent method of elevating the profession—admirable advice conveyed in few words—"Be gentlemen; live, talk and dress as such"—the part of the address as given to the graduates of the Department of Comparative Medicine of McGill University (Montreal Veterinary College).

202542

JULY.—Meeting of the United States Veterinary Medical Association.—Two months more and then *en route* to Chicago—important steps taken—it may make the true *United States Veterinary Medical Association*—hard work of the committee—papers promised—programme well laid out—our thoughts—is it all eastern—where are the western veterinarians—our fears—perhaps the result of our anxiety for success—yet they may be correct—an open letter from a western veterinarian—Dr. Williams gives severe hits, and many of his remarks seem to agree with our thoughts—his open letter. American Veterinary College Building Fund—American veterinary education—veterinary colleges of to-day—colleges in years to come—private establishments—the good they do—the danger that threatens them—duties imposed on officers of colleges—obligations to alumni—new action of the officers of the A. V. C.—inquiries by an alumnus—the condition of affairs— twenty thousand dollars wanted—five thousand donated—fifteen thousand more will allow a building to be started—will that plan succeed?—will it fail?

AUGUST.—"For Alma Mater's Sake"—Our dangerous position in the matter—reasons for our persistence—the sinking fund of the American Veterinary College—various attempts made to raise it—their failure—complete and partial—results of the efforts—the enthusiasm of all and in particular of a few—a new plan proposed by Dr. Coates—his motto and his chances of success.—Contagious Pleuro-Pneumonia in the United States and English Restriction.—Its recognition in this country several years ago, and the English embargo—commissions—Bureau of Animal Industry's successful work—the disease crushed little by little—it is almost all destroyed—action of Hon. J. M. Rusk, Commissioner of Agriculture—an *American* bureau on *English* land—three American veterinarians under the leadership of an American veterinary surgeon start for Europe—our best wishes and our hearty hopes for their success.—The September Meeting of the United States Veterinary Medical Association.—Director Armand Charles Goubaux's death.

SEPTEMBER.—"For Alma Mater's Sake."—Strenuous efforts made in behalf of the American Veterinary College building fund—Dr. Coates' plan—it is the most practical—little time has passed since its inauguration and yet it gives encouraging prospects of success—nearly twenty thousand dollars already promised—shall outside contributions be sought?—would it not injure our *esprit de corps?*—let the enterprise remain in the hands of the alumni. United States Veterinary Medical Association.—A few days longer before it is called to order—strong exertions made by all to ensure its success—our fears ill-founded—Dr. Hoskins' answer to the open letter of Dr. Williams—a reply to it—everything is explained satisfactorily and now "on to Chicago"—the last communication from Secretary Hoskins. Special Notice.—Dr. P. Paquin, one of our best contributors—his communications will receive proper attention in our next.

OCTOBER.—United States Veterinary Medical Association.—Twenty-seventh anniversary meeting—the day of consolidation—the *National Association* is established beyond doubt—all passed harmoniously—pleasant receptions—the welfare of the profession was at stake, hence the success of the meeting—large assembly of veterinarians—fifteen States represented—New Jersey,

Rhode Island, Maine and Connecticut absent—meeting of the Comitia Minora always slow and late—reception by Dr. Williams, of Illinois—forty-two new members elected—a few dropped—the committees for once all ready to report—the election of officers confirms the desire of the members for friendship and harmonious work—the reading of the papers listened to by over one hundred members—interesting discussions follow—the banquet —numerous good toasts, well answered—our condolences to absent friends—*no revision of the by-laws.*

OCTOBER.—EXTRA.—INTRODUCTION 376

NOVEMBER—TOASTS AT OUR LAST BANQUET. General custom—value of answers—those of the United States Veterinary Medical Association—"*The Colleges*" —our answer—comparison between English and American degrees—similar conditions and prospects—creation of the Royal College of Veterinary Surgeons in England—need of a National Board of Examiners for the United States—American veterinary medicine will need a national institution—the *Veterinary College of America*—its influence upon the elevation of the profession and harmony between its members—"*The Veterinary Medical Press*" —duties of the editor—duties imposed on veterinarians—"Veterinary Sanitary Work"—"*National Veterinary* Work"—better attention to meat inspection—let the subject be better treated in veterinary schools. BORROWED FEATHERS.—Duties of veterinary colleges—various titles and degrees—those who have claim to it—those who claim it without right—a letter as evidence—more in hand—one title in England—let us have but one—let it be "M. V. C. A."—this to be the motto of American veterinarians. PASTEUR INSTITUTE. Report of results since its opening in February, 1890. ANNUAL MEETING OF THE ILLINOIS STATE VETERINARY MEDICAL ASSOCIATION. Interesting papers to be presented.

DECEMBER.—INOCULATION OF CONTAGION THROUGH MUCOUS MEMBRANE. —The study of contagious diseases inexhaustible—continuous increase in knowledge concerning them—rabies with all its related controversies—the light is yet far from being perfect—Prof. Galtier's new investigations—the healthy mucous membranes are gates open for the entrance of virus—glanders an exception to it—Director Nocard's experiments— careful cleanliness will protect against it. REAPPEARANCE OF TUBERCULOSIS IN MAINE.—Dr. Bailey's previous work in ridding the State of it—vain expectations of permanent relief—a new out-break in the old quarter—Massachusetts the breeding-bed of the new invasion—that State full of the disease—thirty-five to fifty per cent. of her cattle infected—our previous remarks on the subject—our statement at the Fifth International Veterinary Congress confirmed—the useless criticisms made upon it—it is of Massachusetts as of many others in the Union. KOCH'S "CURE" FOR CONSUMPTION.—The great discovery creates admiration, enthusiasm and anxiety—patients pouring into Germany—the reticence of the profession—of the scientific and medical press—so far the name of the great German physician secures the reception of the statements advanced—interesting and important to all—specially to veterinarians—may Paratoloid prove what it promises.

JANUARY.—ACTINOMYCOSIS IN THE UNITED STATES.—The cases in the West—discussion in the *Breeder's Gazette*—legal action in the matter—the

discussion of the subject probably closed, as merely of home importance—renewal of its importance—possibly of an international nature—Prof. Grandeau's so-called discovery—America full of the disease—our inspection of cattle illusory and inefficacious—the work of the Bureau of Animal Industry almost ignored—Prof. Grandeau's error—does it not call for Dr. Salmon's action, and notification abroad of the new regulations of the Department of Agriculture? KOCH'S CURE FOR TUBERCULOUS DISEASES.—Not much more known to-day than at the beginning—scientists still of different opinions—ought not experiments have been made upon cows?—Pasteur experimented on dogs for rabies, why not Koch on cows? "BACTERIOLOGICAL WORLD."—A new journal—welcome and good success for it and our friend, Dr. P. Paquin, the worthy editor.

FEBRUARY.—HUMAN AND VETERINARY MEDICINE IN THE UNITED STATES.—Progress and status of the veterinary profession—which are due to the united efforts of its members—and its intrinsic value—the resulting foundation of schools—the obligations imposed upon such as science advanced—societies organized—importance of the work at their meetings—veterinary press was started—its success and usefulness—and yet how peculiar the conduct of the human medical profession—how veterinary medical graduates are treated by human medical organizations—how veterinary bodies act towards their medical relations—why?—the difference between this country and Europe. EDITORIAL NOTICE—Our crowded pages—prospective increase in the size of the REVIEW.

MARCH.—TO OUR READERS. NOTICE.

ORIGINAL ARTICLES.

Actinomycosis. By J. Scott. A Paper read before the Illinois State Veterinary Association 7
Coal-Oil Poisoning in the Horse. By S. H. Kingery. A Paper read before the Illinois Veterinary Medical Association 14
The Use of Anæsthetics. By J. F. Reid. A Paper read before the Illinois State Veterinary Association 16
Bovine Tuberculosis. By Dr. E. F. Brush. (Resumé of a Paper on the "Coincident Geographical Distribution of Tuberculosis and Dairy Cattle," read at Albany, at the meeting of the State Medical Society, February 5, 1890.) 19
Influenza. By T. D. Hinebauch 21
Examination of Horses for Soundness. By Roscoe Bell. A Paper read before the Long Island Veterinary Society, April Meeting 56
Report on Inoculation as a Preventive of Swine Diseases. By D. E. Salmon 67
The Inspection of Meat and Milk with Special Reference to Tuberculosis. By A. W. Clement 76
Milk from Tuberculous Cows. How far may a Cow be Tuberculous before her milk becomes dangerous as an article of food. By Harold C. Ernst 125
Enteritis in Cattle Caused by Eating Corn-Stalk Fodder. By G. H. Going. 141
The Veterinarian as a Sanitarian. By I. Newton Krowl 144

The Pathology of Azoturia as suggested by its history and symptoms. By W. L. Williams..... 172
Surgery in Fistula—Pipe or Reed?—By S. Mylne..... 181
Cocaine in the Diagnosis of Lameness. By W. J. Torrance..... 186
The Disinfection of Horse-Sponges. Translated from the German by Richard Middleton..... 189
Antirabic Inoculations, Mechanism of Immunity. Sensations Produced by the Anti-hydrophobic Pasteur Inoculations, as described by Inoculated Subjects. By Paul Gibier..... 191
Cold Abscesses and their Treatment. By W. J. Coates..... 220
A Comparative Study of Anæsthetics. By G. Archie Stockwell..... 224
Azoturia. By C. E. Hadcock..... 237
Inspection of the Brighton Abattoir (Boston). By Alexander Burr..... 241
Antifebrin or Acetanilid. By G. G. Ferling..... 247
Pneumonia. By G. W. Buckner..... 249
Veterinary Hygiology and Antiseptics. By Thomas M. Buckley..... 252
Rabies and Strongylus Tetracanthus. By G. W. Butler..... 276
Thoracic Choke. By W. H. Gribble..... 285
A Few Practical Hints. By S. R. Howard..... 291
Unsuccessful Operation for the Cure of Roaring. By W. L. Williams..... 327
Rectal Examination as an Aid in a Correct Diagnosis of Certain Diseases. By J. M. Phillips..... 332
The Induction of Narcosis in Horses. By Richard Middleton..... 338
Lymph Extravasate in Posterior Limbs of Equidæ. By the same..... 343
Creolin. By Prof. Frohner..... 347
Sainbel, his Live and Work. By T. B. Rogers..... 350
Black Leg—Gaseous Charbon, Symptomatic Anthrax, Bacterian Anthrax. By P. Paquin..... 352
Suppurative Keratitis. By G. E. Griffin..... 364
Castration of the Cryptorchid. By R. Middleton..... 507
Punctured Wounds of the Foot, Involving the Joint. By Dr. Emerson..... 514
The Production of Immunity. By E. A. v. Schweintz..... 520
A Practical Paper on the Castration of the Bitch. By T. B. Rogers..... 529
Bottom Disease. By D. B. McCapes..... 532
The Screw Worm. By M. Francis..... 534
The Treatment of Eczema in Dogs. By F. W. Turner..... 537
Parturient Eclampsia in the Mare. By W. L. Williams..... 559
Infectious Abortion. By J. F. Reid..... 571
Scrofulous Ostitis in Foals. By W. F. Weese..... 574
Osteo-Porosis. By Geo. H. Berns..... 582
Peroxide of Hydrogen and Ozone. By Paul Gibier..... 588
Corn-Stalk Disease. By G. A. Johnson..... 669
Cases in Practice. By Fred. Edwards..... 674
Notes on the Sulphate of Eserine. By S. B. Nelson..... 677
Navicular Disease and Neurotomy. By A. H. Baker..... 680
Uniform Standard of Veterinary Education. By W. H. Pendry..... 683
The Relationship existing between Human and Bovine Tuberculosis. By E. F. Brush..... 687

Castration of the Horse. By Tait Butler..... 613
A New Parasitic Disease of Cattle. By Richard Middleton..... 632
Operation for Cystic Calculi. A Paper read before the Iowa State Veterinary Medical Association. By M. Stalker..... 717
Rheumatism. A Paper read before the Indiana Veterinary Association. By E. Diggs..... 721
Cold Applications *vs.* Counter-Irritation in Pneumonia. A Paper read before the Indiana Veterinary Association. By N. R. Macaulay..... 726
Case Report—Tenotomy. A Paper read before the Indiana Veterinary Association. By C. F. Bell..... 738
The Administration of Medicine. A Paper read before the Indiana Veterinary Association. By A. J. Thompson..... 741
Indigestion in the Horse. A Paper read before the Indiana Veterinary Association. By J. Rodgers..... 747
Leukæmia. A Paper read before the Long Island Veterinary Society. By Geo. G. Vanderveer..... 750

REPORTS OF CASES.

Actinomycosis in Cattle..... 31
Ventral Hernia. By W. H. Ridge..... 33
Urinary Calculi in a Dog. By C. H. Peabody..... 34
Cocaine in Carpal Tenotomy. By the Same..... 35
Jabot, Constriction of the Œsophagus. By J. P. Klench..... 87
Twins in a Mare. By Gulian C. Fagan..... 91
Was it Glanders? If so, is it Cured? By R. A. Stoule..... 91
Twin-Abortion in a Mare. By C. E. Hollingsworth..... 150
Thoracic Lymphanoma—External Cervical and Pectoral Œdema. By W. Labaw..... 196
Obstruction of the Duodenum by Œstrus Equi. By H. N. Walters..... 198
Gastric Fistula—Termination. By J. J. Kraus..... 199
Fracture of the Penis. By C. F. Menninger..... 201
Omentum Hernia in a Yearling Colt. By J. S. Culbert..... 255
Epileptic Fits in a Horse. By R. W. Ellis..... 256
Peculiar Distokia in a Mare. By C. H. Peabody..... 257
Laryngeal Paralysis Operation. By the Same..... 259
Temporal Dental Cyst. By Wm. R. Clausen..... 261
"Stomatitis Pustulosa Contagiosa" in a Horse. By W. J. Torrance..... 306
Obstinate Constipation. By Wm. R. Claussen..... 309
Fracture and Amputation of the Lower Jaw. By D. K. Light..... 311
Impaction of Omasum. By S. C. Orr..... 312
Double Fecundation. By C. Bruden..... 312
Lacerated Wound of Scrotum in a Stallion—Rapid Recovery by Antiseptic Treatment. By W. Labaw..... 313
Sprain of the Flexor Brachii—Ulceration of the Bicipital Groove. By the Same..... 314
An Epizootic Aphthous Fever. By P. Paquin..... 539
Acute Tubercular Meningitis. By T. P. Turner..... 541

Obstetric Cases. By C. H. Peabody..... 543
A Peculiar Case. By H. B. Pratt..... 546
Recurrent Tumors in a Bitch. By A. F. Becker..... 547
Large Carcinomatous Tumor in a Bitch. By the Same..... 549
Pseudo-Rabies in a Dog—Post-Mortem. By the Same..... 550
Thoracic Obstruction of the Œsophagus. By M. W. Drake..... 641
Embolism. By C. H. Peabody..... 696
Eccentric Hypertrophy. By Charles B. Ainsworth..... 699
